Work Logs

Date	Number of Hours	Description of work done
Oct 13 2026	0.5	Initial Figma Research
Oct 14 2026	1.5	Initial Project in Figma, research introduction for Figma
Oct 15 2026	1.5	Learn about Figma design files, pages, assets, property label.
Oct 17 2026	3.0	Learn about shape, image, text (font, size and other properties). Auto-width, Auto-height text layer. Line height, Letter spacing on typography setting. Frame, Frame presets and constraint. Briefly researching on auto layout

Description of work done

This week, I did bunch of research around Figma introduction. I learned about how to create a project and due to free plan, I am only limited to 3 files. I also have a look about pages and how important they are to the project, I can create multiple pages for purposes, for example I can create a page for playground section and testing compatibility of the screen that I planning to use in the future, I can create a pages for the testing and official product just like testing and production environment. Next one is frame, I can make a frame and then put the component such as shape, text, button inside of it using layers, Figma frame also has multiple templates for different types of screens like phone, tablet, desktop, etc... Even slides for presentation. Inside of a frame I can manage through manual click and drag or using auto layout, Auto layout is such a convenience way to work with because it supports filling the gap between component, stretching component by default without breaking constraints.

AI Use Section

AI Tool Name	Version, Account Type	Specific feature for which the AI tool was used
Claude	Pro	N/A

In the past week, I haven't used AI for researching or creating anything, I just learned by watching videos and reading docs by myself.

All the resources I've used:

1. **https://help.figma.com/hc/en-us/sections/30880632542743-Figma-Design-for-beginners**
